Part 2 – Analytics and Growth Layer

8. Progress Tracker and Growth Analytics Module

The Progress Tracker and Growth Analytics Module provides structured academic performance tracking, metric calculations, growth classification, and visual performance insights. This module represents the advanced analytics layer of the platform and must remain fully synchronized with all academic activities performed by the student.

The module must display the following core performance indicators:

- Module Completion Percentage
- Assignment Completion Percentage
- Quiz Performance Summary
- Average Quiz Score
- Average Assignment Score
- Submission Consistency
- Module Completion Rate
- Overall Growth Index (OGI)
- Growth Classification

All values must update automatically and in real-time when any of the following actions occur:

- Assignment submission
- Assignment evaluation
- Quiz completion
- Module completion
- Course marked as complete

No manual recalculation or page reload should be required for metric updates.

Calculation Logic

Module Completion Percentage = Completed Modules / Total Modules × 100
Assignment Completion Percentage = Submitted Assignments / Total Assignments × 100
Quiz Performance Summary = Average Quiz Score based on completed quizzes
Average Quiz Score = Sum of Quiz Scores / Total Quiz Attempts
Average Assignment Score = Sum of Assignment Marks / Total Assignments
Submission Consistency = On-time Submissions / Total Assignments × 100
Module Completion Rate = Completed Modules / Total Modules × 100

Overall Growth Index (OGI)

The system must calculate a unified performance score called the Overall Growth Index (OGI).
OGI =
(Quiz Average × 0.40) +
(Assignment Average × 0.30) +
(Completion Rate × 0.20) +
(Consistency × 0.10)

Growth Classification

Based on OGI, the system must classify student performance as:

- 85–100 – Excellent
- 70–84 – Improving
- 50–69 – Stable
- Below 50 – Needs Attention

Growth Dashboard Requirements

The module must provide a dedicated Growth Dashboard screen displaying:

- Current OGI value
- Growth classification badge
- Line chart showing weekly performance trend
- Bar chart showing module completion overview
- Weekly performance history table

The Progress Tracker and Growth Analytics Module must remain fully synchronized with:

- Dashboard statistics
- Course progress data
- Assignment records
- Quiz attempts
- Attendance records (if included in performance logic)

This ensures complete consistency across the platform and reflects the student's real academic standing at all times.

9. Job and Internship Module

Students must be able to:

- View available internships
- View job listings
- Apply via external link

Each listing must include:

- Company Name
- Role
- Required Skills
- Application Link

Dummy data allowed.

10. Alumni Module

Students must be able to view:

- Alumni profiles
- Current Company
- Position
- LinkedIn link

Dummy data allowed.
